

MX8200QT

Smart Branch Solution

A totally new and innovative solution offering maximum productivity to the branch and unsurpassed convenience to customers.

MODULAR DESIGN

The **Monimax8200QT** features an open-architecture and modular design, providing the flexibility to take advantage of the current and evolving ways in which customers utilize the institution's branch network.

SMALL FOOTPRINT

For branches with limited floor space and lower traffic, this provides the ideal consumer experience and investment return. The **Monimax8200QT**'s modern look and feel is just what customers expect in today's service economy.

OPTIMUM SOLUTION

The advanced cash recycling technology built by Nautilus Hyosung will help financial institutions benefit from cash dispensing, cash deposit, and recycling. In this manner, cash is efficiently managed. All five cassettes can be operated independently in dispense, deposit, and recycling mode to enable optimum utilization for effective self-service operations. With the addition of a check acceptance module, check deposit is enabled.

MAXIMIZE PRODUCTIVITY

The **Monimax8200QT** is designed to facilitate the move of a high percentage of routine transactions from the teller line to the self-service channel. In this manner, the role of the branch personnel evolves from transaction service to relationship building and sales.

MAXIMUM RELIABILITY

Ease of maintenance and simplified service ensure high availability and uptime with little operational intervention. The **Monimax8200QT** is designed and engineered with the quality and craftsmanship you have come to expect from Nautilus Hyosung.
