

CONVENIENT PATIENT SERVICE

Pharmacy Pneumatic Scripts Delivery System

The Hamilton Pharmacy Pneumatic Scripts Delivery System is customized for each pharmacy to ensure optimal functionality in every installation. The complete system includes customer and operator units, tubing, and Audio/Video communications equipment. The system can be configured with overhead and/or underground tubing to fit the needs of each store.

HIGHLIGHTS:

FEATURES

- ✓ Easy customer input through call and send buttons located in dual locations offers comfort to your customer in various sized vehicles
- ✓ Quick and clear communication using integrated two-way audio equipment
- ✓ Privacy options with audio handsets
- ✓ Video communication options integrate seamlessly with the audio system (Operator only or two-way operator and customer video available)
- ✓ Various carrier styles and sizes to fit your package transport requirements
- ✓ Available with either overhead and/or underground tubing (systems can include both if needed)
- ✓ Customer units have a small footprint with front service access to limit space required
- ✓ Our new turbine design offers an integrated air power motor package for easy service access, which will reduce down time during servicing
- ✓ Designed with a sleek, weather resistant stainless steel exterior
